

“**iw**aited days for data restoration during system failures. Now it takes an hour.”

The most advanced data protection? The answer is in the clouds.

Now you can protect your pharmacy's greatest asset, your data, using the very latest cloud-based service—iProtect. This proprietary, cloud-based, backup/archival service includes Viewmaster 3.0 companion software, a revolutionary tool that allows you to view transactions, while offering additional features that make responding to audits more accurate and convenient than ever—even when multiple store locations are involved.

iProtect also features:

- Our exclusive Rapid Recovery service that restores data access in as little as an hour
- Military-grade security
- Complete HIPAA/HITECH compliance
- Universal accessibility to your entire archived information history—anywhere, anytime

We'll take care of your data. You take care of your customers.

We validate your backup, making sure it's constantly stored in a safe, secure place—eliminating extra work for you, *and* the worry that an old, outdated magnetic tape could cost you days without data access. And if there is a system failure we manage the data recovery process, so you can continue to manage your business.

30 Days Free, Plus Free “Get Compliant!” package.

For a limited time you can try our revolutionary iProtect system free for 30 days. This breakthrough technology starts at only \$25/month—and we'll be glad to let you put it to the test with no obligation, free. We'll also include a free “Get Compliant!” package with all you need to know about staying HIPAA/HITECH compliant.

“Balls Food Stores is a locally owned grocery store chain operating as Price Chopper & Hen House Markets in the Kansas City metropolitan area with 20 pharmacies. When we acquired the files and inventory from another pharmacy, we utilized InfoWerks' backup and archival service with Viewmaster 3.0 software. Not only did it make the transition quick, secure and accurate, the system has proven to be a cost-effective, long-term data management solution for us.

I highly recommend InfoWerks. They have given me the confidence to trust them with all my future data needs.”

John Witt, Pharm.D. Pharmacy Specialist, Balls Food Stores
