infowerks
pain-free data solutions

"iWent through a lot of problems with data conversions, then I found InfoWerks."

Want best-in-class conversions? Convert to InfoWerks.

You're in the Rx business, not the IT business. You shouldn't have to worry about data conversions. So you'll be glad to know that many of the nation's largest pharmacy chains, and independents, rely on iConvert for worry-free data conversions.

- With iConvert, your data conversion solution is customized—not cookie-cutter. We develop the system that works for *your* unique needs.

- We pioneered the use of military-grade data security protocols. Along with verification systems and redundant storage protocols.

- All data transport methods are encrypted and secured. Even if mailed, our proprietary Archive CDRs assure your data assets aren't compromised.

- We further secure your data in redundant off-site storage. Your data is always available with zero downtime.

- You get all this, with no additional or hidden fees.

We offer the flexibility to manage any platform—from your existing system to your new one. And to us every job is custom—we have vast experience with every permutation of software, hardware and, of course, pharmacy.

> *"SpartanNash is a leading food distributor and grocery store chain headquartered in Grand Rapids, MI that operates close to 200 stores, many with pharmacies.*
>
> *We recently merged with Nash Finch Company, and confidently turned to InfoWerks for this major, 22-pharmacy data conversion. They've demonstrated time after time that no matter which data system we're working with, or how short the lead time, they can meet every deadline and budget.*
>
> *In fact, InfoWerks file conversions are now one of the easiest parts of my pharmacy acquisitions. We've never had to delay a pharmacy opening because of a data conversion issue. Who wouldn't want to work with a company like that?"*
>
> **Bryan Hull**, Manager of Retail Technology Services, SpartanNash
